Roymment Pampitet Will teil ab About His 1 edigree and Vices.

Washington, Aug. 24 .- The deputment of agriculture is about to assua builetin prepared by Latomolog L. O. Howard, on the mosquitos or mic United States. It discusses the structure and blology and ludicaces the difference in all stages of existence between the kind of mosquitos that transmit malarla and those that do not.

Since the opening of the gold fields and traders, knowledge of the abundance and ferocity of the Alaskan mosquitos has become widespread. Government surveying parties starting for Alaska consult the department for mosquitobite remedles. Those who were in Alaska the preceding year claim they never experienced or even imagined anything in the mosquito Line quite equal to those found in our northern territory.

Mentioning the reputation of New Jersey in connection with mosquitos, the bulletin says there is a constant carriage inland from the marshy coast of mosquitos, the rallway trains seemng to be the most important mode of conveyance. Many of the cars contain mosquitos by the hundreds. In this way even mountain resorts get their supply of lowland mosquitos, and with the improvement of railway service and the increase in the number of through ears, the danger is constantly Increasing. The source of supply to distant points where mosquitos are ordinarly rare, is thus kept up.

About 250 specimens of mosquitos are known, of which only about 30 have been found in the United States. The report says that of the remedies in use in houses the burning of pyre thrum powder and the catching of mosquitos on the walls in kerosene cups are probably the best next to a thorough screening and mosquitobar about the bed. The remedies for bites are glycerine, a lump of Indigo and household ammonia.

Withdrawai of Troops Might Be Consirned by China as a Retrent. Distuctioners in Japan's Sphere of Influence.

Washington, Aug. 24.—The question of the withdrawal of the United States forces from Peking to Tien Tsln or Taku has been seriously considered by the president and his advisers. A great deal of pressure has been brought to bear upon the administration to take this step. Negotiations In Alaska and the Influx of miners for the settlement of the questions growing out of the disturbances in China must take place lu the Chinese capital and it has been determined that while these negotiations are pending and until they are completed it will be necessary for the United States forces to remain in the Chinese capital. While it is recognized to a a withdrawai of the forces from Peking might be hailed with satisfaction in this country, it is believed the moral effect lu China and Europe and upon the Chinese would be bad and would

oe interpreted in China as a retreat. Plans are being made to furnish supplies to the United States troops in Peking. The department has ascertained that the Taku port will be open until November 15 and before that time it is expected that most of the supplies can be shipped to Taku. The railroad between Taku and Tien Tsin is in good condition, but some estimate that it will take nearly three months to repair the railroad between Tien Tsin and Peking. Meanwhile the Pei-ho river and canal can be utilized for transportation until the river freezes. The commissary and medical stores which were shipped on the transport Meade and destined for China have been ordered to be unioaded at Nagasaki and sent to Taku on the transport indiana.

Dispatches were received from General Chaffee, but only those giving casuaity lists were made public.

The state department's dispatch from Consui Johnson at Amoy that marines, presumably Japanese, had landed there, may cause a diversion to that section similar to the recent affair at Shanghai. The Japanese legation here has not been advised of the actual landing of marines there, but it is said the Japanese consui at Amoy a short time ago applied to the government for warships to guard against any emergency which might

It embraces the province of Fu-Kien, the principal centers being Amoy and i'u Chow. As a "sphere" it is chiefly important to Japan, as it lies opposite to the island of Formosa, which Japan took from Chlna as the result of her late war.

EVIDENCE CONVINCED HIM,

Of Powers' Guilt, Says the Unly Republican Who Was on the Jury.

[Courler-Journal Special.]

It is understood that the attorneys for the defense, in preparing Powers' motion for a new trial, asked J. C. Porter, the Republican jnror, if he was frightened into voting for conviction. It is said that they were hopeful of getting him to make an affidavit to that effect. I'orter replied positively that he was not influenced in any way in his action, and that his vote was based solely on the testimony. Other members of the jury say that when they retired to make their verdict Porter said:

"Gentlemen, I'm a Republican, and when I was sworn I felt that Caleb Powers was an innocant man, but the testideficit, which will have to be provided mony has convinced me that there was a for by the Legislature, is indisputable conspiracy to kill Goebel, and that Powers was one of the conspirators."

Porter is one of the most highly respected and influential citizens of Scott County, and made speeches last fall for W. S. Taylor.

You Can Save \$4.00 Now

On every bundle of AMERICAN WOVEN WIRE FIELD FENCE bought of us. We are receiving another large shipment of these goods, for which we are the sole agents in this locality, and are actually in a position to name figures that will save you the above amount on each bundle purchased. Compare these quotations with former prices and you will readily perceive the truth of this assertion. We are enabled to make this offer on a CASH basis only, and give notice that for every charge 5 cents per rod extra will be asked. The "American" is undoubtedly the cheapest, neatest and most durable fence on the market, and prospective purchasers will do well to take advantage of this offer while it lasts.

Every rod of this fence is guaranteed by the manufacturers, and of the vast quantities we have sold to the farmers of this and neighboring counties, we have yet to hear of the first instance in which it failed to give entire satisfaction. Whether used as a stock fence, a hog fence or a division fence in towns and villages, it is equally handsome and inexpensive.
